

ORDISAT

SORTING STATION FOR PIGS

Sorting Station with animals weighing.

Effective solution to manage fattening pigs in large group

Designed to manage fattening pigs in large groups, the Ordusat concept enables a differentiated feed and improves the animal sorting.

The station will send the animal to the right feeding space (dry or wet) according to their weight (growers and finishers). At the end of the batch, Ordusat automatically sorts the pigs that reached the weight requirements defined by slaughterhouse.

CONTROL

Sorts Automatically the animal's ready for slaughterhouse.

PERFORMANCE

No more manual sorting, saving times.

TIME

Savings on time and labour (wash rooms).

SUITABLE

Savings building area 7 to 5% vs Traditional. (Streamline of living space).

EFFICIENCY

Daily growth monitoring.

MANAGEMENT

Increased and centralized surveillance of animal growth.

STATION STATION FOR FATTENING PIGS

CAGE WEIGHED AND ARCH OF ENTRY TO LIMIT ACCESS

WEIGHING SYSTEM ON THE TOP OF ORDISAT CONCEPT (CONVENIENT ACCESS)

ADJUSTABLE ANTI-RETURN GATES AND ANTI-SLEEPING BAR

COMPARATIVE TABLE

Example for 4000 fattening places	Cleaning time	Selection time	Control time
Traditional system	8 h	4 h	10 h
Ordisat system	3 h	1 h	5 h
Save time	5 h per week save more than 50%	3 h per week save more than 70%	5 h per week save more than 50%
