

DURABLE AND VERY SOLID LIVESTOCK DOORS

We offer you durable and very solid LIVESTOCK DOORS.

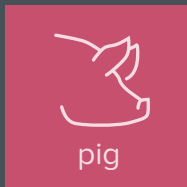

The door leaf is completely filled with PVC.

The door has fittings, frame and hinges made of reliable acid-proof stainless steel.

- | The materials used guarantee the highest level of hygiene and easy cleaning.
- | The frame and hinges are made of acid-proof stainless steel, thanks to which they are resistant to all detergents, slightly acid and alkaline agents.
- | They ensure long durability in the microclimate environment of pig farms, barns, henhouses(chicken coop?) poultry farms, etc

- | Intended for use inside the farm.
- | Available in right or left version.
- | Custom size door available on request
